Build 14.017 – Nov 06, 2019

Resolved Issues

1. **Resolved issue with Filter Editor for Blanks and NonBlanks.**
Issue observed when using the Filter Editor on columns to display Blanks and NonBlanks not filtering results correctly. This is now resolved.

Build 14.016 – Feb 08, 2018

Enhancements

1. **Improved performance when exporting with currency symbol.**
Code adjusted for exporting with currency symbol to improve the processing time when exporting to excel.

Resolved Issues

2. **Resolved issue with Export to excel failing to display originating amounts for Smartlist objects created through Designer.**
Issue observed when SmartList object is created through Designer and contains transactions that are not functional currency. The excel export is displaying the amount as 0.00 instead of the actual amount on the Originating currency. This issue is now resolved.

Build 14.015 – Jan 09, 2018

Resolved Issues

1. **Resolved Latency issues when exporting to excel.**
Issue observed when exporting to excel that export progress bar failed to update accordingly during export. This had also caused latency with the export to excel. This issue has been resolved which had also appeared to improve export performance.

Build 14.014 – Dec 13, 2017

Resolved Issues

1. **Resolved issue with incorrect format with export with Currency Symbol.**
Issue observed when exporting to excel with currency symbol and the item has a number of decimal places for quantity greater than 0. If Quantity was less than 1000 then it exported to excel in the incorrect format. For example, if quantity was 132.0000 then it would show as 1 320 000 in excel instead of 132. This is now resolved.
2. **Fixed problem with trailing blank space on String fields when exporting to Excel.**
Problem was observed when exporting to Excel that String fields contained a blank space at the end of the string value. Users were unable to manually adjust in deleting the blank space in excel. This is now resolved.
3. **Fixed Issues with Leading zeros on String fields being removed.**

Issue observed that if String field contained leading zeros that the zeros were removed in the export to excel. This is now resolved.

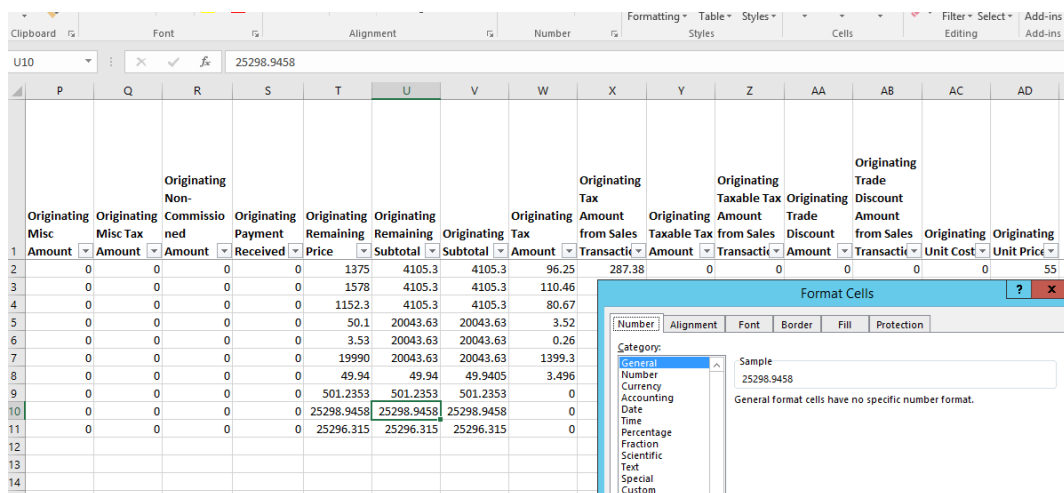

Build 14.013 – Sept 18, 2017

Resolved Issues

1. Resolved decimal places export issue.

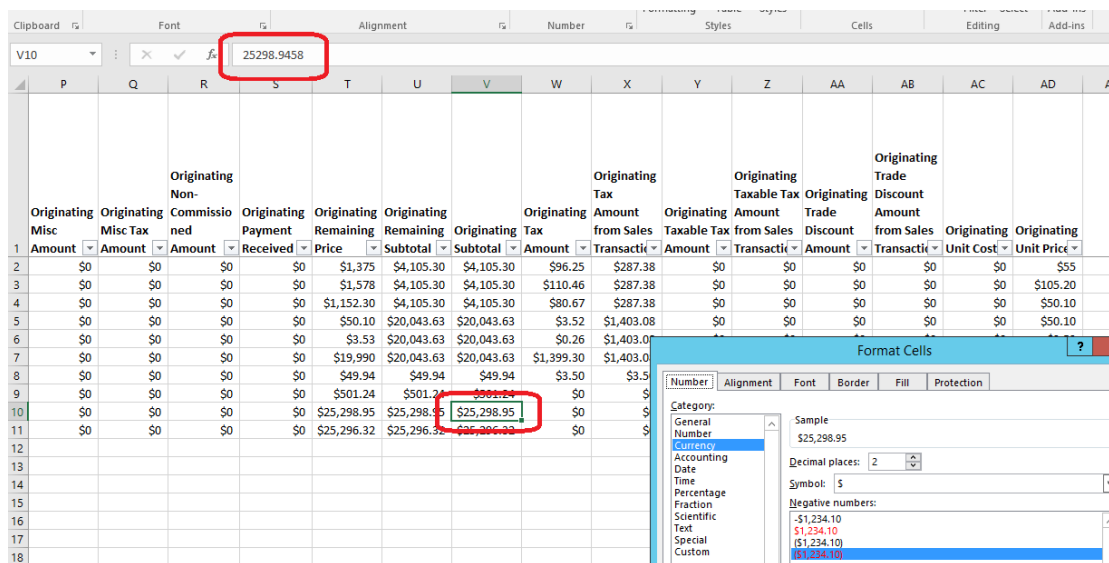

Issue observed when exporting to excel the decimal places was defaulting to 2 decimal places.

Updated added so that when exporting without currency symbol it will display the exact number of decimal places as shown in GP. However, it will no longer have a thousand separator. Should the decimal places in GP have a 0 value then it will display without decimal places in Excel as cell format will be general. For example, if value in GP is \$1,000.000 then field will be display as 1000 in excel export when exporting without currency symbol.

Update Added when Exporting with Currency Symbol it will still display the 2-decimal place value in the exported report. However, the rounding of the fields will display the correct value for the full decimal places for the Line item. Should you require to display more decimal places you can highlight the entire column and adjust the format cells.

Build 14.012 – July 18, 2017

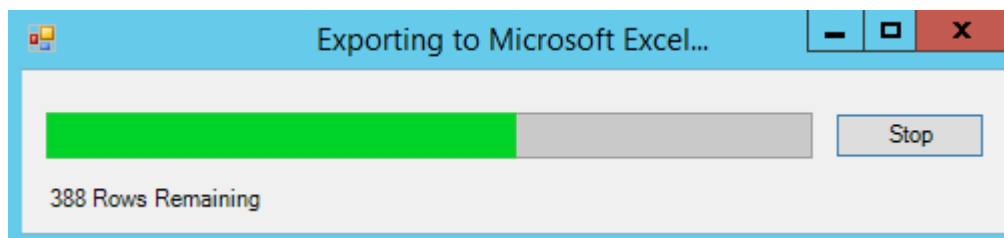

Resolved Issues

- Resolved text fields converting to numeric when exporting to excel.**
Issue observed when exporting to excel should text field in SmartList object only contain a numeric value the export converted it to a numeric field setup. Any prevailing 0's were removed. This is now resolved.

Build 14.011 – June 06, 2017

Enhancements

- New Record Count display when exporting records to excel.**
When exporting to Excel you will now receive a record count indicating the number of rows remaining as part of the export. You have the option to stop the export by selecting the Stop button which will stop the export at the record remaining.

Resolved Issues

- Resolved single quote on export to excel on string fields.**
Previous export to Excel would result in a single quote at the beginning of each string field when exported to excel. This has been updated so the single quote is no longer used when exporting string fields.

Build 14.010 – Released with Build 14.011

Resolved Issues

1. Improved currency format issues in export to Excel.

Further issues observed for currency fields when export to excel with French Currency Format. Data exported as text when region language setting set for French Canadian Language. Problem has been resolved to ensure data is exported as data and cell format is correct based on excel export selection.

Build 14.009 – Mar 20, 2017

Enhancements

1. Improved Microsoft Office Interop Excel.

Microsoft Office Interop Excel Dll updated to the latest available version 15.0.4569.1506 for improved compatibility with Office 2013 and higher.

Resolved Issues

1. Improved currency format issues in export to Excel.

Issue observed for currency fields when export to excel. Field exported as text when language setting set for French Canadian Language. Problem has been resolved to ensure data is exported as data and cell format is correct based on excel export selection.

Build 14.008 - Jan 25, 2017

Resolved Issues

1. Resolved issues with excel format for currency fields for French Canadian language settings.

Known issue that currency fields would export as text field types for amount fields with French Canadian Language settings. Issue has since been resolved. With Language setting as French Canadian amount fields will export in correct cell format.

Build 14.007 - Dec 20, 2016

Enhancements

1. Improve ASL export to Excel to default to normal layout when exported to excel.

With this update, users can still have Excel set for a Page layout or custom layout settings as the default layout but it will default as normal for the excel export.

Resolved Issues

1. Resolved issues with Currency format export to display in the proper format for French Canadian language settings.

Issue was observed which resulted in Currency fields displaying in incorrect format when exported to excel for French Canadian language settings. This update provided will display the currency as proper format but as a text field.

2. Resolved problems with Currency Symbol still displaying when exporting without currency symbol.

Issue was observed when currency field was Originating amounts. When exporting without currency symbol the originating amount fields would still display the currency symbol. This issue has since been resolved.

Build 14.006 – Feb 24, 2016

Resolved Issues

- 1. Resolved issues with exporting without Currency Symbol**

Issue noticed when exporting to excel without Currency Symbol not removing the Currency Symbol when the symbol contained the letter C. This issue has since been resolved.

Build 14.005 – Sept 18, 2015

Resolved Issues

- 1. Resolved issues with exporting to Office 2010**

Issue noticed when exporting to excel 2010 causing GP to crash. Issue has since been resolved.

Build 14.004 - Aug 27, 2015

Resolved Issues

- 1. Resolved issues with Build number listing incorrect on about screen**

Issue noticed when accessing About window for Advanced SmartList build was listed as 001 for all builds. Issue now resolved and window will display correct Build.

Build 14.003 – July 08, 2015

Resolved Issues

- 1. Resolved issues with Increase and Decrease Width under Favorites in SmartList.**

Issues noticed with increase and decrease width resulting in Advanced SmartList failing to load SmartList object. Issue has since been resolved

Build 14.002 – May 29, 2015

Resolved Issues

- 1. Fixed issues with Exporting to Excel for Summing feature.**

Issues noticed with Summing on Footer only in Advanced SmartList resulted in excel file generated without Sum. This issue was resolved.

Problem occurred with Summing on footer only while item was grouped resulted in a group count on the export file instead of sum on the export. This issue has been resolved.

Issue noticed on Currency columns in Advances SmartList being exported in Text format to Excel. Format corrected to numerical format.

Build 14.001 – (rebuild) Feb19, 2015

Enhancements

1. ASL build recreated for GP2015

Code was rolled up from ASL Build 12 rebuild of GP2013. Which resolved issues with exporting without currency symbol to display correct number of decimal places on currency amounts.

Build 14.001 – Feb 11, 2015

Enhancements

1. ASL build created for GP2015

Code was rolled up from ASL Build 12 of GP2013.

Support Request Tip:

To assist in expediting the review of any issues please ensure that the following information is provided with a support request:

- What product is the support inquiry for?
- What Version of GP is used?
- What is the build number installed for the product?
- (this can be found by logging into GP as SA and going to Microsoft Dynamics GP > Tools > support > system > Encore product registration Once there locate the product from the list and the Build number would be listed on the right hand side under Version)
